

**Hi, I'm Ohmni!
I'm your mobile health
buddy. Let me tell you
more about staying
healthy.**

Want to know more about staying healthy and caring for your loved ones?

Ohmni is a robotic Alex Advocate who can show you health education videos and connect you to the Alexandra Hospital Care Team via Zoom.

With Ohmni, your care can be anchored at home and in the community.

If you're 65 years and older, and need further advice, information, or an assessment of your care needs, get in touch with our AH Geriatric Services Hub.

Robots visit homebound seniors, enabling tele-consultations with hospital staff

Have you heard of robotic cats used in seniors' care in Japan? Here in Singapore and at AH, we have introduced a "game-changer" to anchor care in the home and community. Meet **#Temi**, an interactive robot who follows homebound seniors and zooms the care team in for **#telehealth**, and displays customised education videos tailored to the senior's holistic care plan at the touch of a widget. Paired up with our **#AlexAdvocates** volunteering in the community, these robots are being trialled to see if we can change the way we care for our patients. Thanks to Nera Telecommunications Limited and Asia Resource Corporation Pte Ltd (through **Centre for Innovation in Healthcare - CIH**) for their kind donation of these robots, Temi and **#Ohmni**.

In conjunction with the third instalment of "AH Care Day – Alex goes to Mei Ling," a new Geriatric Services Hub was also declared open by Mr **Eric Chua**, MP for Queenstown (Tanjong Pagar GRC). Thanks to our strong community partner, **Lions Befrienders** for supporting AH's initiative. For information on referrals, email: AH_GSH@nuhs.edu.sg or call 1800-CALL GSH (1800 225 5474).

Exciting times ahead! 🥳
